A.T. WALL PROVIDES FLEXIBLE WAVEGUIDE AND COMPONENTS TO INTERNATIONAL MARKET

Precision drawn waveguides ideal for high frequency transmissions

WARWICK, RI - A.T. Wall Company, a world-class supplier of superior precision tubing and fabricated metal components, announces that it provides flexible waveguide and waveguide components to the international market. Products include seamless flexible waveguide, flexible twistable waveguide, flexible waveguide, and semi flexible waveguide. In addition to tubing, the company now also offers components for all these flexible waveguide types.

A.T. Wall supplies flexible waveguides in beryllium-copper (BeCu), brass, and phosphorous bronze in a wide range of sizes, from WR22 through WR650. Seamless flexible waveguide is applicable to airborne systems and space in all satellite applications. Flexible waveguide also saves the customer money by reducing space needs with its ability to be bent to fit into small spaces.

Based on increased demand from China and other overseas customers, A.T. Wall has added flexible waveguide components to its flexible waveguide tube capabilities. The company now supplies component flanges to the tube ends, and offers pressure testing of the assembly.

Well-versed in export regulations, A.T. Wall is registered under International Traffic in Arms Regulations (ITAR), and is also familiar with international air and sea shipping requirements. Knowledgeable company manufacturing representatives in more than 30 countries are available to visit customers, review electrical performance, power handling, and mechanical specifications, and present A.T. Wall's unique capabilities.

###

About A.T. Wall Company

Founded in 1886, A.T. Wall Company is a part of the ATW Companies and is a world leader in the production of seamless cold drawn specialty tubing and metal stampings that include drawn and coined products. A.T. Wall's state-of-the-art manufacturing facility, located in Warwick, Rhode Island, serves the needs of customers throughout the world in a variety of industries, including: Aerospace, Electronics, Telecommunications and Medical.

The company provides rapid turnaround on the design and manufacture of specialty items for which mill numbers are not required. For more information on A.T.Wall, visit www.atwall.com , call 401-739-0740 or write dparker@ATWall.com.

About ATW Companies

Headquartered in Warwick, RI, ATW Companies is a provider of highly engineered metal solutions to the metal component marketplace, servicing customers worldwide. The company runs state-of-the-art manufacturing facilities located in California, Pennsylvania, and Rhode Island and offers global sales and support. ATW provides a wide range of fabrication technologies to meet the exacting requirements of industries and diverse technologies for the most critical applications. The company's motto is "Be the Best...Do it Right," and they strive to live by this commitment to quality, reliability, innovation, and integrity by continuously adding value to their products and services.
